PROFESSIONAL SUMMARY

A Technical Writer with a strong interest in creating user-friendly technical documentation. My expertise lies in crafting user guides/manuals, technical blog posts, FAQs, and developer resources, including API references, and tutorials that empower users to utilize software products effectively. Adept at collaborating with Subject Matter Experts (SMEs) to translate complex concepts into clear, concise, and engaging content.

WORK EXPERIENCE

Technical Writing Mentorship Program   **February 2024 - September 2024**
Technical Writer

- Developed a comprehensive course outline for API Documentation and authored two detailed articles with illustrative examples and assignments.
- Authored a comprehensive article with over 1500 words on SEO basics, providing actionable tips to help technical writers understand and integrate SEO into their content.
- Developed a beginner-friendly guide on using Visual Studio Code.

Fira   **January 2024 - March 2024**
Technical Writer(Contract)

- Leveraged software development knowledge to create comprehensive API documentation, reducing development errors.
- Crafted website content potentially leading to a reduction in development time.
- Collaborated with Subject Matter Experts (SMEs) to gather in-depth technical details, enabling the creation of internal knowledge base documentation that reduced new employee onboarding time.

SKILLS & TECHNICAL TOOLS

Technical Writing & Development:

- **API Documentation, Product Documentation, Doc as code:** Proficient in crafting clear, concise, and user-friendly technical documentation using industry-standard practices.

Tools: Git, Github, MKDocs, Docsify, Lucidchart, Miro, Postman, Jira, Gitbook, Confluence, Notion, Markdown, Google Docs, Msword, Visual Studio code, Astro Starlight, Mintlify, Dropbox.

Content Management:

- Proven ability to research, brainstorm, and develop innovative content ideas that align with audience needs and business goals.
- Experience in leading and managing content production from initial concept to final execution, ensuring high-quality standards
- Proficient in utilizing project management tools like Notion, Jira, or Confluence to effectively manage content production pipelines, track progress, and ensure timely delivery.

OPEN SOURCE PROJECTS / CONTRIBUTION

JSON Schema

- Audited a page in the JSON Schema documentation and proffered a solution

- Ensured consistent use of pronouns throughout the content, removed ambiguous content for better understanding, and revised headings for improved information hierarchy.
- Rewrote the page for clarity and better content organization.

[Radeur API](#)
- Documented the open-source Radeur API, allowing users to rate their network based on location and device
- Described all available endpoints with examples.

VOLUNTEER EXPERIENCE

Base Africa   **September 2024- Present**
Sub-Community Lead
- Onboarded over 15 newbies to blockchain and the Base ecosystem
- Hosted a Twitter space with 112 live listeners to share insights on how non-technical builders can leverage onchain tools and get involved in the Base Around the World buildathon
- Provide information and resources for developers and creators to get started in web3 and Base.

Google Developers Student Club   **July 2023 - August 2024**
Core Team
- Collated data and created user-friendly registration forms for virtual and physical events, leading to a 60% increase in event registrations compared to previous methods.
- Tutored 50+ participants in virtual and physical classes for the 2023 Google Android Compose Camp event
- Collaborated with the core team to write a proposal for funding for the upcoming Google Tech fair event

Google Developers Group   **September 2023 - December 2023**
Publicity and Protocol Management
- Worked with core team members to publicize the annual Devfest event, which resulted in over 500 attendees.
- Contributed to the event's success by managing on-site logistics and protocol on the event day.
